

RAW, 2020 Race Series Owner Arrive & Drive Program

The RUSH Auto Works RUSH SR-1 will have its inaugural Race Series launched as a Central Region for 2020 hosted by NASA Pro Racing Texas Region. The RAW, 2020 Race Series will feature events at some of the most challenging tracks in the central states including Hallett Ok, Texas Motor Speedway, NOLA and the prestigious COTA F1 circuit. The series will also travel to Utah Motorsport Campus for its inaugural visit to the NASA National Championships!

We have had many enquiries from drivers who wish to purchase a car to participate in the series that do not want to have the long haul from the West, East and even Canada! To facilitate this, we have developed an option for an owner arrive and drive program.

Owner Arrive and Drive Program - Participants will purchase their own RUSH SR-1 car. The car will be stored at our facilities in Houston, receive a full preparation for the event and shall be transported to and from the event. We will then provide a series “Tent”, paddock spot and a mechanic shared between 3 cars. Drivers and their mechanic will have access to the series set-up pads and tools, series driver coach and data analyst. Each paddock spot will be a 20’ x 20’ spot with 2 tables and chairs. A series hospitality area with refreshment, snacks and a cold cut lunch will also be provided.

This program has been designed to allow drivers the “Fly-in Experience” in a friendly club environment, yet participate in a highly competitive and high-performance series at a fraction of the cost of some of the traditional arrive and drive race programs. Indeed, an owner can purchase their car and participate in the entire championship for less that a single race in one of the other recently launched arrive and drive series!

The costs for RAW 2020 Owner Arrive and Drive program are as follow:

01	Per Event Fee (Includes above detailed Services)	6	\$ 1,150.00	\$ 6,900.00
02	Utah, Additional Haul Out Costs	1	\$ 300.00	\$ 300.00
03	Monthly Car Storage	10	\$ 125.00	\$ 1,250.00

Driver is responsible for the costs of Entry Fees, Tires, Spares, Fuel and Consumables. Pre-race preparation includes 4 hours labor to prep the car and does not include, crash damage repair, major repairs, any consumables or spare parts used. Owner will be required to have a spare set of wheels for mounting fresh tires during the event. Transportation includes transportation of the car and a maximum of 2 sets of additional wheels and tires. We do not transport owner toolboxes paddock equipment or personal items.

Cars can be prepared to owner requested finish and livery at additional costs. We will also require that the owner schedules a full car fitting at our shop prior to the first event to be attended for full seat, pedal and ballast fitting, as this will not be possible to do at the track during the first event. Owner is welcome to schedule access to their car for testing proposes anytime between events with reasonable scheduling.
